

# Travel Iowa Route Map Widget

## Installation Instructions

**Step One - Add this one-line script onto your site in the code where you want the widget to display:**

```
<script src="https://www.traveliowa.com/RouteMap/widgetTool "></script>
```

Which will display this:

## Step Two – Adjust Widget Parameters:

### Parameter Definitions:

- **mto:**  
This is the default the “Ending City”. NOTE: If there is a space in the city name, use a “+” sign instead of a space. Example: `mto=Des+Moines`. In the script, it would look like this:

```
<script src="https://www.traveliowa.com/RouteMap/widgetTool?mto=forest+city&wsz=500"></script>
```

- **wsz:**  
This is the size – width – in pixels of the widget. The default is 700 pixels. Example: `wsz=500` will display the widget with a width of 500 pixels. In the script, it would look like this:

```
<script src="https://www.traveliowa.com/RouteMap/widgetTool?mto=forest+city&wsz=500"></script>
```

- **url:**

This is for logging/tracking purposes. Please enter the name of your site, or the URL for your website. Example: `url=www.thisIsMyWebsite.com`. In the script, it would look like this:

```
<script  
src="https://www.traveliowa.com/RouteMap/widgetTool?mto=forest+city&wsz=500&url=www.thisismy  
website.com"></script>
```
